Google Cloud collaborates with CryptoWire to develop blockchain, cryptocurrency ecosystem

January 6, 2022 by admin

NEW DELHI: TickerPlant, a subsidiary of 63 moons limited technologies, today announced its partnership with Google Cloud to develop the CryptoWire ecosystem, which caters to all stakeholders in the cryptocurrency and blockchain industry on a common platform. As an exchange-neutral global platform, CryptoWire aims to simplify the digital asset class, blockchain technology, its industrial application and enable enthusiasts and professionals to make informed business decisions by offering cutting-edge insights and knowledge. State-of-the-art knowledge portals from CryptoWire, CryptoTV and Crypto University will provide knowledge-intensive global technology and intervention in crypto assets and the blockchain ecosystem to enable seamless operations and convergence of all applications for participants to make informed investment decisions and enable the useof the blockchain industry.

Speaking about the partnership with Google Cloud, TickerPlant CEO and CEO Jigish Sonagara said, "The fast pace at which the cryptocurrency and blockchain markets have moved clearly meant that we needed a technology partner who could help us scale. in real time. By working with Google Cloud, we can provide access to people around the world with well-crafted information with speed and accuracy in a rapidly changing environment and ensure a meaningful approach to addressing the information gap. " TickerPlant will draw on Google Cloud's scalable, reliable, and high-performance data management infrastructure to build and expand CryptoWire applications, as well as leverage its innovative network

capabilities for video streaming, content delivery, execution business and the convergence of opportunities.

Google Cloud India CEO Bikram Bedi said, "We are thrilled to provide secure and scalable cloud infrastructure to innovative companies such as TickerPlant as it accelerates and scales access to blockchain and cryptocurrency information with CryptoWire and supports them while they develop new products and offerings to create value for customers and users. "

Additionally, Mumbai-based CryptoWire will also explore advanced Google Cloud solutions including intelligent data analytics, machine learning and artificial intelligence to deliver a superior customer experience.

Rushabh Shah, COO of TickerPlant, said: "The convergence of Google's Cloud network with CryptoWire, CryptoTV and Crypto University has created a new frontier of multifaceted global growth that will be fully utilized by next-generation economies, industries, stakeholders, entrepreneurs. and professionals ".

On Monday this week, CryptoWire, a global cryptocurrency super app that is a special business unit of TickerPlant, launched India's first cryptocurrency index – IC15 to boost knowledge about the cryptocurrency and blockchain ecosystem.

The IC15 is a broad rules-based market index by market capitalization and tracks and measures the performance of the top 15 widely traded liquid cryptocurrencies listed on the world's leading cryptocurrency exchanges.

In particular, Bitcoin, Ethereum, XRP, Bitcoin Cash, Cardano, Litecoin, Binance Coin, Chainlink, Polkadot, Uniswap, Dogecoin, Solana, Terra, Avalanche and Shia Inu are the components of IC15. Last month, global financial content provider TickerPlant unveiled their super cryptocurrency application, which is set to be a single destination for cryptocurrency enthusiasts to get real-time pricing information, breaking news, data and graphs. It will also provide

courses related to cryptocurrencies. The super app is available for both Android and iOS devices and also has a web browser platform.
