## **CryptoWire: Google Cloud partners with CryptoWire to develop blockchain, crypto ecosystem**

*January 6, 2022*

New Delhi-based TickerPlant, a subsidiary of 63 Moons Technologies Limited, today announced its collaboration with Google Cloud to develop the CryptoWire ecosystem, which caters to all stakeholders in the cryptocurrency and blockchain industry on a common platform.

As a global exchange-neutral platform, CryptoWire aims to simplify the digital asset class, blockchain technology and its industrial application, enabling enthusiasts and professionals to make informed business decisions by offering deep insight and leading-edge knowledge.

The cutting-edge knowledge portals of CryptoWire, CryptoTV and Crypto University will provide a global knowledge and technology-intensive intervention in the crypto-asset and blockchain ecosystem to enable seamless operations and the convergence of all applications for participants to make informed investment decisions and enable industry use of blockchain.

Speaking about the partnership with Google Cloud, TickerPlant Managing Director and CEO, Jigesh Sunagara, said, “The phenomenal pace at which the crypto and blockchain markets have moved clearly means we need a technology partner that can help us scale in real time. Working with Google Cloud, We can provide access to people around the world with well-crafted information quickly and accurately in a rapidly changing environment and ensure a targeted approach to address the information gap.”

TickerPlant will leverage Google Cloud's scalable, reliable, and high-performance data management infrastructure to build and extend CryptoWire applications, as well as leverage innovative networking capabilities for video streaming, content delivery, intelligent business execution, and opportunity convergence.

Bikram Bedi, Managing Director of Google Cloud India, said, "We are excited to provide secure and scalable cloud infrastructure to innovative companies like TickerPlant as they accelerate and expand access to blockchain information and cryptocurrencies using CryptoWire, and support them while developing new products and offerings to create value for customers and users."

In addition, Mumbai-based CryptoWire will explore advanced Google Cloud solutions including intelligent data analytics, machine learning and artificial intelligence to deliver a superior customer experience.

"The convergence of the Google Cloud Network with CryptoWire, CryptoTV and Crypto University has created new, multifaceted global growth frontiers for their full use by economies, industries, stakeholders, new generation entrepreneurs and professionals," said Rushabh Shah, COO of TickerPlant.

On Monday this week, CryptoWire, a global cryptocurrency app and a private business unit of TickerPlant, launched India's first cryptocurrency index – IC15 to advance knowledge about the crypto and blockchain ecosystem.

IC15 is a broad, rule-based market index by market capitalization that tracks and measures the performance of the top 15 most widely traded liquid cryptocurrencies on the world's leading crypto exchanges.

Notably, Bitcoin, Ethereum, XRP, Bitcoin Cash, Cardano, Litecoin, Binance Coin, Chainlink, Polkadot, Uniswap, Dogecoin, Solana, Terra, Avalanche and Shiba Inu are the components of IC15.

Last month, global financial content provider TickerPlant unveiled its own cryptocurrency app, which aims to be a one-stop-shop for crypto enthusiasts to get real-time price information, the latest news,

data and charts. It will even offer cryptocurrency related courses. The super app is available for both Android and iOS devices and has a web browser platform as well.
